PROJECTS

Circle of Fifths *github.com/jminor90/circle-of-fifths*
ReactJS, Bootstrap *jminor90.github.io/circle-of-fifths/*

   A simple application that uses JSON data to build musical scales based on the Circle of Fifths in Music Theory.

Music Junkeez *github.com/jminor90/music-junkeez*
GraphQL, ReactJS, NodeJS *music-junkeez.herokuapp.com/*

   A music forum where users can sign in and discuss their favorite musicians, songs, and albums. Collaborative project built in ReactJS and utilizes Spotify's API. Responsible for GraphQL with Apollo Server implementation.

The Translator *github.com/jminor90/the-translator/*
JavaScript, jQuery, Tailwind *jminor90.github.io/the-translator/*

   An application that returns exchange rates and language translations when given a single country of origin utilizing Google Translate, RestCountries API, and ExchangeRate API. Primarily worked with estful API functionality.
